Submission: Objection

Comments: STRONGLY OBJECT

This is an area of green belt and is therefore totally unacceptable, due to the destruction of the landscape and harm it will undoubtedly cause to existing wild life.

It will also increase the risk of fire and explosion to the area as there have already been a number of high profile incidents involving BESS sites.

The NPPF emphasizes the importance of considering the cumulative effects of developments in decision making and should therefore be taking into account the combined effects of multiple developments in the area. The current applications, if approved would destroy over 250 acres of green belt !!
