Submission: Objection

Comments: Large scale industrialisation of GREEN BELT land subject of unacceptable explosive and toxic risks to neighbouring people and properties. Destruction of wildlife habitat. Unacceptable noise and light pollution. Ruination of heritage rural community and loss of crop growing land.

These numerous applications for solar farms and battery storage are contradictory to green energy as the components are manufactured by coal loving China and probably using slave labour.

All the damage incurred by these proposals could be avoided with a much better off shore wind turbine, proven to be far more effective.
