Dear Sir/Madam,

Vehicle Access Crossing (Dropped Kerbs) (Highways Act 1980 Sc184)

Approval Reference Number: 4374080

Your Application Ref.: OLF-174315-7244

I refer to your recent application to Staffordshire County Council for a vehicle access crossing and I can confirm your application has been approved. The following summarises the details of the approval and any special conditions that apply:

Location: Land East of Sandfields
Street/Road: KINGSLEY ROAD
Town: CELLARHEAD

Conditions applied to approval:

A04 Access crossing approved in line with planning consent SMD/2022/0589. A works agreement will likely be required for works to an existing sign (to be replaced/relocated) and for widening of a footway.

This approval is valid for 3 years (or for the same period as planning permission if applicable) and therefore you do not have to do anything immediately, but please note that once you have decided to commence works, your chosen contractor is required to apply to the highway authority for a 'Permit to Dig' which is chargeable. This separate permit is necessary to book the works dates to the network allowing for co-ordination with other works, activities, events and incidents. Your chosen contractor manages this process so you do not need to do anything further yourself however you do have a responsibility to ensure that your contractor has been granted a Permit to Dig before works commence as failure to do so can attract a fine or even prosecution. The highway authority or Police may request a permit to be produced on site at any time during the works.

Please provide your contractor with the Vehicle Access Crossing Approval reference above and the agreed approval conditions and size etc.

Kind regards,

Traffic and Network Management
