Submission: Objection

Comments: I object to this proposal as I am extremely concerned that those officers making these environmentally crucial decisions are untrained in this major development on our green belt land . The battery storage is a safety and fire risk and this has been proven in other areas. This is a lucrative venture for those who want to make big money by selling land for this type of development where brown field land exists and is encouraged in other areas. We cannot get green belt land back for future generations , I am strongly in favour of the green agenda but not for clear financial gain where other options exist , these batteries emit noise and have no respect to the wildlife .
