Submission: Objection

Comments: I object to these proposals for the following reasons

Impact of these battery storage sites on the precious green belt land, health and safety concerns especially fire risks and accessibility to site in the event of an incident.

Concern that SMDC planning department has not followed the correct assessment process, these sites including this one are not located in an area designed to be used in an industrial way.

Has there been a comprehensive landscape impact and development study carried out and have all other alternatives been explored inc brown belt land ?

The cumulative impact of all these proposals including this one change the character of the countryside , its residents and the local community. There is an impact on the mental health for those immediately affected by these decisions and for all of us who enjoy the benefits of green spaces, people like me, who live in the Potteries.
