Submission: Objection

Comments: I object to this and its associated applications. I spend time in the area regularly when visiting family and have deep concerns over the impact this development will have on the local community, environment and on those who visit for enjoyment.

The development would cause irreparable damage to the fragile flora and fauna ecosystem of the area. The scale of the site would become a dominant feature on the landscape and ruin people's ability to enjoy. No one wants to see solar panels in place of green fields.

Whilst I do not object the development of green energy in principle, the drive to a sustainable future should not be done in a manner that erodes integrity of the precious natural environment we already have. There are numerous potential sites within Staffordshire that are brownfield and could host such developments. Therefore, I cannot help but feel this proposed development is purely for financial gain rather than concern for the environment.

This development must be rejected.
