SCALE:
If printed correctly the entire grey bar below should measure 10cm, the scale can then be used to approximate real sizes
For example if the scale of the drawing is 1:10 then every 10cm on the drawing equates to 1m in reality.
1:10 (10 cm = 1m) // 1:20 (10cm = 2m) // 1:50 (10cm = 5m) // 1:100 (10cm=10m)
1:200 (10cm=20m) // 1:500 (10cm=50m) // 1:1250 (10cm = 125m) // 1:2500 (10cm = 250m)
