Comments: The proposed site is:

1. In Greenbelt, too close to where people live and work (260m) and Wetley Moor Common (300m). Distance by OS map. These would be affected by noise, and the potential fire and explosion risk now known with battery sites.

2. The proposal can not be considered with the impact of current proposals, both approved, and pending. The potential environmental impact of these is not acceptable and unfair to ask one community to accept These are SMD/2021/0853, SMD/2022/016, SMD2023/0523, SMD/2024/0019,0055,0523,0653,0039,0023,0566,0049,0639.

3. Local Roads will not cope with traffic if potentially all schemes are accepted. All schemes add up to 662 battery containers, 141 transformers, 392 inverters, 1195 items at say a trip each - 2390 lorry journeys in and out during construction. On roads not big enough for 2 such vehicles to pass, and passing Moorside High School. This excludes waste and construction traffic.

4. The specific proposed site has one entrance in and out, so can not comply with National Fire Chief Officers recommendations for such installations.

The site is unsuitable, and unsafe.
