Submission: Objection

Comments: The proposed development is not appropriate for the Green Belt.

The development and operation of the proposed development will have a significant adverse impact on the local environment.

There is an unacceptably high risk of fire to these installations and the application still does not comply with the guidance from our National Fire Chiefs Council.

<https://nfcc.org.uk/wp-content/uploads/2023/10/Grid-Scale-Battery-Energy-Storage-System-planning-Guidance-for-FRS.pdf>

Such 'shortcut developments' will put the safety of local residents at significant risk.

The access roads to the site of this proposed development are inappropriately narrow and restricted, so the proposed development is not appropriate for the access roads that would have to serve it.
