Email:

Submission: Objection

Comments: I object as follows:

This land is within the Green Belt and good agricultural land

Batteries onsite will create a considerable fire/explosion risk with hazard to health and life both human and wildlife.

The noise levels from the site will disturb neighbouring households.

The site will lead to the destruction of Wildlife habitats

Planning and Government policy states that good quality farmland / Green Belt should be protected and this is both.

Government policy states that the accumulative effect needs to be considered on the local area when considering planning for such sites. There are already numerous applications in place within the immediate area with two sites have already been passed in 2022. Many local residents have not been consulted on these applications meaning many are unaware of what is happening around them. How is this right
