Submission: Objection

Comments: I object to extension of the already existing substation. The land on this application is good farming ground which is a few metres away from the protected western boundary of the Churnet Valley Masterplan. The Government states that we should be protecting our Green Belt and good agricultural land and this contradicts this. The council should seriously consider the cumulative impact that adding to an already existing substation will have on the local residents and our Greenbelt. There are already numerous applications in the area for a solar farm and BESS sites in meaning further devastation to our Greenbelt and industrialisation of the area.
