Submission: Objection

Comments: In relation to the visual splay and access to the site adjacent A521. Two years prior to this application a large area of earth and stone embankment was dug out by Mr. Worral. Around the base of a very healthy and stately copper beech tree and the left. It remained healthy and in full leaf until he had it felled over the last bank holiday weekend in May this year 2024 when he had it felled over a period of days. This appears to have been orchestrated to try to achieve sufficient visual splay on the access to his planned development. It surely contravenes tree conservation in development and surely should have been done after planning consent had been gained not prior. The tree stood on the access to 83 Town End right on the outer edge of the proposed development site. At that time he was within days of submitting his plans
