Submission: Objection

Comments: I strongly object to this extension, currently the view is blighted by the substation however in the spring summer months trees slightly obscure the view of the metal that is completely not in keeping with the surrounding green belt land. Extending this will not be covered by any trees and is more likely to destroy the trees that currently offer slight coverage. Wildlife will definitely be affected, notably the birds of prey that frequent the area, kestrels, buzzards as well as deer that i have seen using the fields around the substation. Furthermore noise generated by the extension will likely cause an impact to the wildlife as well as me and my family who live adajcent to the substation, the surrounding roads are narrow and tight, recently resurfaced which cause dmassive cost and disruption that will be deemed useless if this extension is to take place, it is without doubt due to the neighbouring multiple applications for BESS and solar panels. I strongly object to this and worry that the value of my home will be substantially impacted, and my life and my children. We moved here to enjoy greenbelt views, clean air, quiet beautiful views and now this is being suggested and is not in keeping with the area.
