### MAIN ISSUES

- Impacts on Historic Assets
- Design

### DESCRIPTION OF SITE

The application site relates to St Giles RC Primary School Cheadle. St Giles is a Grade 2 Listed Building that forms part of an important group of Pugin buildings in Cheadle. The building is set back from Charles Street behind a number of dwellings to the east and St Giles Church to the north. The land to the rear of the site has been developed for housing.

Vehicular access to the site is via the driveway linking directly to Charles Street and restricted by a gate to the front of the entrance. There is fencing around the playground area away from the vehicular access drive. The building has previously benefitted from a number of planning and Listed Building approvals.

For the purposes of planning policy consideration the building is Grade 2 listed, it sits within the Cheadle Town Development Boundary and the Cheadle Conservation Area. The application is accompanied by a Design and Access Statement.

### PROPOSAL

The applicant sought planning permission for 2m rail fencing along 54.5 metres of established hedged boundary between the school driveway and eastern part of the churchyard. The fencing is to improve the security of the primary school as currently, the adjacent churchyard is publicly accessible and a privet hedging is the only preventive to stop intruders from accessing the school.

No objection

#### **Environmental Health**

No objection

### **OFFICER COMMENTS**

#### **Principle of Development**

The application site is located within the Development boundary of Cheadle as such the principle of the development is considered acceptable, subject to the impact of the proposals on the historic integrity of the Listed Building, the character and appearance of the Conservation Area and the amenity of nearby occupiers.

#### **Impacts on Historic Assets**

Policy DC2 of the adopted local plan seeks to safeguard, and where possible, enhance the historic environment which includes designated heritage assets and listed buildings and conservation areas. In accordance with the Town & Country Planning (Listed Building and Conservation Areas) Act 1990, development is

required to preserve or enhance the character and appearance of a heritage asset.

Paragraphs 206 and 207 state that any harm to, or loss of, the significance of a designated heritage asset (from its alteration or destruction, or from development within its setting), should require clear and convincing justification. Substantial harm to or loss of: a) grade II listed buildings, or grade II registered parks or gardens, should be exceptional; b) assets of the highest significance, notably scheduled monuments, protected wreck sites, registered battlefields, grade I and II\* listed buildings, grade I and II\* registered parks and gardens, and World Heritage Sites, should be wholly exceptional. Paragraph 208 requires that where a proposal will lead to less than substantial harm to the significance of a designated heritage asset, this harm should be weighed against the public benefits of the proposal including, where appropriate, securing its optimum viable use.

The fencing and visitor access gate will have the potential to have an impact to the setting of the listed building as it will introduce railed fencing along a substantial length of the primary school's border. While the fencing will sit closely against the hedge, it would introduce a mass of hard landscaping within a fairly green setting.

A judgement needs to be made in respect of whether the benefits of the scheme outweigh the identified harm. It is noted that the fencing will not be fixed directly to the building but rather along the thus not harming its actual fabric but the fence will have some impact upon the views of the school.

In accordance with the National Planning Policy Framework (NPPF) harm (classed as less than substantial harm) should be weighed against the public benefits of the proposal. In view of this, the security fencing and gate will provide a substantial public benefit as the proposal is needed for the safety of the pupil's safety. Also, the proposed gate would control access onto the school premise that is not being managed by the current gates at the entrance of Charles street especially during pick up and drop off times when there are an influx of people on site.

Given that the fabric of the building will not be harmed and does not affect the setting of the listed building, the balance is in favour of supporting this part of the scheme.

The Council's Conservation officer has confirmed that she does not foresee any issues in terms of heritage and therefore, it is considered that there will be no harm to the character and appearance of the heritage assets or those nearby.

## **CONCLUSION**

The proposed fencing and access gate will result in some visual impact however, it is considered that the merits of the scheme and the wider public benefits that will be brought about significantly outweigh any harm.

For these reasons it is recommended that the application is approved subject to conditions.

**OFFICER RECOMMENDATION :    Approve**
