Subject: FW: App ref DOC/2024/0043 Fole Dairy Remediation Scheme

Hi Hannah,

Further to the attached request:

I have reviewed the submitted document by Lee Remediation

<http://publicaccess.staffsmoorlands.gov.uk/portal/servlets/AttachmentShowServlet?ImageName=356820>

The document is generally accepted and is considered well written, however, could I request minor amendments are made prior to acceptance:

Some of the plots (Plots 7 and 8) are subject to slightly different capping depth requirements and this should be highlighted in Section 6 and 7. The verification for this area should also include identification / photograph of the proposed orange membrane.

It is noted that acceptance criteria is developed around C4SL standards for Arsenic and Cadmium it would be preferred that this is amended to S4UL or SGVs as a more precautionary approach. It is noted that no exceedances (even minor ones) of C4S values are permissible, and further sampling of imported material may be required if values are close to the C4S limit to ensure statistical confidence.

Thanks

Dan
