Hello

Planning Application DET/2024/0031

I am contacting to with a view regarding the proposal for a 20M high monopole 5g mast at the The Village, Endon.

I live around 35m from the proposed site.

Whilst I recognise the need for improved phone services in Endon, I do however feel that this proposal is wholly unsuitable at this location.

The Village junction with Leek Rd, is the gateway to the Endon Village conservation area, (where strict planning controls are enforced) and adjacent to several residential properties and businesses.

The visual impact of such a tall mast cannot be understated and there are surely better locations for a 20m (65") substantial mast i.e.. The layby towards Leek or the sewage processing plant a little further on.

Kind regards

Mark Brammar
