A very pleasing mews-style semi-detached with a frontage that features either horizontal ship-lap boards or vertical hanging tiles according to position and/or site. Contemporary fascia links projecting garage in a long clean sweep. Look closely—everywhere the craftsmanship and attention to detail you'd expect in houses costing much more. And inside not an inch has been wasted. Three ample bedrooms, fully appointed bathroom and full size kitchen with built-in sink unit. The spacious lounge/dining room is light and airy, with convenient french window. There's an integral garage with up and over doors (no snow to clear in winter) and an inside fuel store. The Mews House brings you all that's best in imaginative planning. Why not step inside and see for yourself?
