

Tree / Hedge root protection zone

e-mail from applicant's ecologist 25th June 2024

Subject: Re: Hawthorn hedge

Good afternoon Kelly,

Please see the response from our arboriculturist.

"Based on that information (100mm avg stem diameter) They should allow 1.2m root protection zone and use ground protection over the RPZ to prevent compaction (if access over the RPZ is required.)"

Kind regards,

Jordan
