Adaptation Request Form

Details of request

Reason for adaptation (and options considered)

Nathan has Parkinson's Disease and will eventually become a permanent W/C user and be hoisted for transfers.

Nathan and his wife have 2 young children; therefore a straightforward bathroom adaptation is not feasible and there is insufficient floor space both upstairs and downstairs for a Through Floor Lift.

Due to the aggressive progression of his PD a stairlift is not feasible.

WORKS REQUIRED:

Feasibility of converting the garage into a first-floor extension to house a bedroom and wet room.

JOINT FEASIBILITY VISIT REQUIRED WITH OT
