Comments: This is a blight on the rural area. Whetley Moor is an area of SSI I believe. The storage of these batteries is highly dangerous. What safeguards would there be for the public when batteries explode - we keep hearing of awful incidents of batteries in electric vehicles exploding. These sites would hold scores of batteries. The thought of this type of accident in the proximity of residents is truly frightening. What resources would be near to attend such an accident? 'Local' fire brigades would not be able to access the area quickly or be effective. Think about the catastrophe that happened at Luton Airport carpark! Look online at the aftermath of the explosion there and then tell me that an electric battery storage facility in our locality would be safe - I think not!
