Submission: Objection

Comments: I object to this planning application. The main reason is because of the very real risk of fire & explosion.

The risk is too much. There are far too many applications for this BESS in this area , it is concerning that there is no thought to the vicinity of properties & residents & all the worry this will cause them & their wellbeing & mental health.

The roads & infrastructure are not suitable for all of the large vehicles that will be used to set up this operation & heaven forbid if there is a fire of how emergency services will deal with this.

Once this land is lost it will never be returned to how it was. The detrimental effect on the animals & birds & flora & fauna will last forever they will never come back. The soil & grounds will be affected by this & the waterways.

This will impact our food security.

Please listen to the concerns of the residents around who have not been involved or consulted about this properly & in full. Not enough is known about the long term effects of this.

There are other ways to get to net zero, look at other countries who are trying different ways to achieve this without causing devastation to their countryside
