

Planning Application SMD/2024 0429

Simon Martin

To Planning Comments (SMDC)

I'm objecting to this planning . I live nearby and go along Lea Laughton lane each day. Someone at work has just mentioned some changes to the lane I've just looked at the plans and not happy about them .

For a new entrance to be put on that slope is ridiculous . I can see that it'll be difficult for me to see cars coming from the corner and that they can't see me soon enough if they are turning at the junction or going into the drive .

Tractors go up and down and trailers frequently and are they going to be going in there as that would be dangerous where the change is supposed to happen for anyone travelling. I cannot understand that if machinery is going in there why can't they use the existing entrances ?
