ST9 9LA

Submission: Objection

Comments: We are building green energy initiatives that we have no idea what the consequences are.

I strongly object to building battery storage sites in close proximity to residents. Although I understand that these are important in us getting to the net zero target, sites must be chosen for them that do not put lives at risk.

The cumulative impact of all these BESS sites must be considered. The fire risk is enormous.

To understand the risks please refer to this database

https://storagewiki.epri.com/index.php/BESS_Failure_Incident_Database
