To whom this may concern.

I have received a letter from you dated 09/10/24, regarding the above subject. Apologies for the delay, as we have been away, out of the country.

We are totally against the proposal SMD/2024/0423 and any other applications regarding this subject.

These have been known to explode, catch fire and emit a constant noise. The build time will incur, large amounts of work and traffic noise, which will affect not just us and our neighbours but also, the visitors to our Glamping business.

We set up our Glamping business, end of 2019 and thrive due to the peace and tranquillity of the location. This is noted and can be seen in our reviews.

Our business is of advantage to our village, surrounding villages and further afield. Bringing in revenue and benefitting local, small and large businesses within the Staffordshire Moorlands area.

The threat of explosion, unsightly Battery storage and constant noise, could stop people using our facilities and could end up closing us down, which in turn, would affect all aspects of the above fore mentioned.

If there was a catastrophe, who would be held responsible for it? The land owner, the applicant or Staffordshire Moorlands planning department?

To that end, we have a duty of care, not only to ourselves but to our visitors, neighbours and local businesses that are supported by each other.

Yours sincerely

D. W. and K Ball

Holly Grove Farm.
