ST Classification: UNMARKED

Good day,

The submitted 'Drainage Layout' (drawing: C2C – X – XX – M2 – D 550 REV: P01) shows all foul sewage is proposed to discharge to the public foul sewer, and surface water is proposed to discharge via a pumped flow rate to the watercourse at 5 litres/second, with an overflow to the public surface water sewer at 5.2litres/second. Can the applicant provide calculations on how the overflow rate of 5.2litres/second was achieved, and also confirm this is via gravity flow and not pumped.

We therefore would ask that the drainage related condition is not discharged at this stage.

I trust you find the above in order, however, if you have any further enquiries then please do not hesitate to contact us at Planning.apwest@severntrent.co.uk.

Kindest regards,

Rhiannon
