Comments: I object strongly to this planning proposal due to its proximity to our home and the protected wetley moor common again we as residents have not been consulted at any stage of this planning wildlife studies haven't approached us I'm sure we have a lot more experience of the wildlife in our area there is a barn owl nest site next to the site we draw are drinking water from a borehole on our property the water course from the common crosses our land and the proposed site down to Stanley reservoir any ground pollution could affect our health and others we live in a dark quiet area light and noise pollution would have a detrimental effect on our lives and the area we call home fire risk with its proximity to our property the wildlife of the common relies on this land to survive any alterations to this will have an effect to the common and its wildlife
