

LIGHTING ASSESMENT

COOP LEEK – Projector signs

The lighting requirements at the above site are considered to be sympathetic to the location of the public house & its neighbours. However, they are required to illuminate & advertise the building to its fullest potential.

The lighting is all internally illuminated & will only be used when the store is open.

The lights are simply replacements to the existing approved signage.

The beam orientation on the proposed pictorial signage is 90 degrees with a span of 1.8metres.

The candellas per sq m is 24.096531.
