

## **HERITAGE STATEMENT**

### **Coop Leek – West St, ST13 8AF**

The proposed signage will by no means have a detrimental effect on the surrounding area. The signage replacement is based on “like for like” replacements. Taking into account the conservation area that the site sits within.

The building is not a listed building. All features of the building are being kept & nothing other than fascia/ car park signage is being changed. The proposed signage will contribute to the community by making the car park easier to navigate.

The changes will improve the car park use for its customers.

The works are justified, as the new car park signage is required due to current signage not indicating the location of the car park.

The proposed signage is almost a “like for like” replacement for the existing signage scheme which has always received planning approval due to every effort been made to keep the car park up to date and appealing as well as easy to use.

Full details of the signage and images are included in the signage pack as part of the application.
