Submission: Objection

Comments: Current application is too close to my address, I am concerned about noise and traffic pollution around the site. I am also anxious regarding fire health and safety issues as I understand the batteries and other components are difficult to manage in a fire.

We have lived here long term with pylons present (obviously these have been upgraded to carry higher voltages in recent years) and feel this extra application will greatly impact our property valuation, which has already been negatively affected by the pylons.
