Submission: Objection

Comments: The proposed planning is has far more negatives than positives. The size of the site, predicted noise, safety and construction/maintenance are all serious concerns for all within the locality of this site. The destruction of greenbelt land that would be impacted by construction is unforgivable. The beauty and aesthetics of the local area would be destroyed and again this is unforgivable. The country supports green energy but this proposed site is completely unsuitable, will have a negative impact on the lives of all local residents and will cause more more harm to nature than good.
