

RE - Rebuilding of garages on School Green, Ipslaes.
STD 20x

I am writing to you with a grave concern about the rebuilding of garages on School Green, Ipslaes.

1. The New rebuild of the garage with planning. The bricks are nowhere near matching the buildings in the conservation area - They need to be reclamation - hand made - and the same colour. These bricks stick out like a sore thumb. This area is a sensitive area of conservation and this garage does not fit the area footprint by a mile. AND A TIN ROOF

2. We believe that plans are in for the rebuilding of the oldest garage. This garage has stood for 100's of years and need to be preserved and not knocked down.

If plans are given to build like the other garage - demolished and new brick, it will lose all what is history and conservation in this highly sensitive historical area. The new garage which has been built already has eroded the conservation footprint
