Submission: Objection

Comments: Further to our previous comments we are concerned

that the report to which the Environmental Officer refers

quotes 40dcb whereas the specification sheet included

with the application states a sound level of 60dcb.

Again we would ask that it be sited at the rear or side

of the property as once in situ we will be left without recourse.

If it is resited it will be less impactful within the conservation

area as at the front it will be clearly seen from the road.
