Submission: Objection

Comments: I am concerned about the safety and extent of this development.

My understanding is that the sandstone of Quarry 2 has a serious fault line running through it and is unstable. It has also been filled with dumped tailings and unstable materials. The area is clearly marked as quicksand and would be a dangerous environment for the public to be near. If there were to be fatalities, SMDC would be at fault for allowing this over-extended development in an inappropriate location.

The application lacks any plans for safe access to the proposed development in Quarry 2. The existing access is not safe for public use.
