Submission: Objection

Comments: I note with alarm that the Air Quality Assessment prepared by Environmental Visage makes it clear that these boilers substantially increase the levels of pollutants in the immediate area which includes my garden, where as I have said our grandchildren play. The increase of both the oxides of nitrogen and particulate matter may well fall within current Air Quality Standards, but this is an arbitrary limit determined as much by political expediency as environmental protection and does not offer an assurance of clean air. The report further states that the air quality is likely to fall below the required standard in the future, which is not acceptable.

I therefore reiterate my strong objection to this proposal.
