Submission: Objection

Comments: This project should not be approved due to the following..

Locality(75metres) to Wetley moor common, Wetley more is a SSSI site, and wildlife haven, recent rare birds spotted on there are Red kite, Merlin, Goshawk, Curlew, lapwing and Oyster catchers, the land is low lying and will be very difficult to screen and will be a complete blight on the landscape, it sits almost 1 mile from the cellarhead substation so there is much more land in favourable positions on the fringes of the substation that would be far better suited

. The proximity to dwellings is also of huge concern, the biggest victims are thise of Little Armshead farm and New house farm, being just a few metres away. Finally, there is also a small stream that runs within the boundary of the proposal that feeds directly to Stanley pool/reservoir, for me, the risk of having a feeder stream to a local reservoir beneath a BESS site should outweigh all other matters, no amount drainage, attenuation, oil separators, shut off valves or similair can 100% gaurantee zero pollution into drinking water source in such immediate proximity.
