Submission: Objection

Comments: So this application returns without addressing the reasons it was rejected last year.

Why is that ?

Are the developers just unconcerned about residents as there are not many of us so no biggy if we get evacuated from our homes or worse?

These emerging technologies should not be placed so near residents until there is a full understanding of them & I have yet to hear anyone speak on them that does fully understand them.

You are destroying the countryside for future generations.

This development is quite clearly in green belt, it is not generating energy so does not fill the special circumstances requirement.

SMDC should be stopping these applications from getting this far and wasting everyone's time and money
