Submission: Objection

Comments: I object to the Moneystone Phase 2 application on the following grounds.

1. There is no proposal regarding gaining access to the site either directly via a public highway or from within the Phase 1 granted application.
2. There are geological fault lines running through the quarry as stated in early documentation related to SMD/2014/0682. These fault lines have not been addressed in the current application. A suitable peer review of the quarries geology needs to be commissioned.
3. The quicksands within the quarry are openly admitted to be highly dangerous. The proposal to provide and use footpaths across the quarry floor must be considered foolhardy and potentially life threatening. A suitable peer review of the quarries quicksands area needs to be commissioned.
