Application Reference No. : SMD/2024/0568 Site Address: New House Farm Luzlow Lane Bagnall Staffordshire ST9 9JZ Stoke-On-Trent Comments by: Ian Thomas Bush
From:

Submission: Objection

Comments: I visit the area frequently as I have family living in the area so I have been visiting on a regular basis over 30 years. I am aware that the whole area has BESS applications all over it (over 400 acres) and the cumulative effect should be looked at on a whole and not on a case by case basis. It can be clearly seen on plan how these applications are going to join together and impact and industrialise the area. These BESS sites are dangerous and will impact hugely on residential properties and businesses in the area. There is only one entrance and exit to the site which causes a health and safety risk to services entering / exiting the sites in the case of a fire. The toxic fumes would cause also cause hazard to peoples health. It is known that the area is also on a water course which leads to Stanley pool and contamination could be caused if anything gets into this. People use this area to walk, cycle in and these sites will impact peoples enjoyment. The site isn't even near the substation and the link up would cause huge disruption and damage to the area to put this in. This is without even looking at the impact to the greenbelt and the fact this site is right next to the common and nature and wildlife currently pass through this. I hope that the right decision is made and the application for this is refused.
