Submission: Objection

Comments: I have already commented on this application but I am so upset about the absolute disregard by planners to the parking problems of nearby residents that I felt I must comment further. The parking situation is already an absolute misery. I do not go out in my car at the weekend or during the evenings as I know I won't be able to park when I get home. If the planners lived nearby and had to struggle with children, luggage or shopping when forced to park two streets away from home they would not be so casual with their remarks.

The residents in the apartments would not use public transport as it is not viable for commuting to work. The likelihood is that the majority of them will have cars. If the applicants and the council want to develop the mills then they must be prepared to go to the expense of putting in parking. The developers don't care about restoring the building they just want profit.

I would like the mill to be restored but it has to be done in a way that does not have a detrimental effect on the neighbourhood.

The only alternative I can see, which would probably be unpopular, is to have parking permits. This would prevent the people who work in the town from using the streets in the town as free car parks

Apologies for the long comment but I am so frustrated that local residents are completely disregarded.
