Comments: The safety aspect of these large BESS developments are of paramount importance. The terrible risk of fire & explosion are a very real possibility & the proximity of residents homes & businesses would be a disaster.

The risk to all the farmland, green belt & the wildlife that would be destroyed.

The infrastructure is not suitable .

The land will never recover & will be destroyed for ever.

The materials that are required are not 'Green' they are not recyclable & are made in China using lots of coal based energy, so it is not stopping the world's production of greenhouse gases. It is a false economy.

The pollution of our land that will be caused by this .

Poisonous fumes/gases , fire & explosion is a very frightening thought.

Please explore other ways to bring about net zero that are safe & do not destroy the lives & impact the mental health of residents & visitors to the area that enjoy the beautiful green land, farmland & wildlife & birds of prey
