Email:

Submission: Objection

Comments: I am totally against this application.

The loss of prime agriculture land needed for food production.

Visual impact.

The loss of green and pleasant land, habitat for mammals, insects, birds All are important and we have no right to destroy.

Danger of fires and toxic fumes from batteries and the visual impact of the storage units.

Do we really know if the pylons and radiation will affect the health of people living in the vicinity?

Solar panels having to be imported from China? What cost to the environment?

How will this proposal connect to the grid and when would the solar project be up and running? If it's years away will. Technology have moved forward. Making this idea totally obsolete.
