Submission: Neither

Comments: This application needs recursing. Building on green space destroys fauna, flora, wildlife insects, and bird habitats. All important for our eco system without this circle of life earth will be destroyed.

Lithium batteries and their storage facilities have not been 100% proved to be safe.

If they start to burn it is hard to extinguish the flames in the mean time the air is filled with toxic fumes that kills.

This is a really bad idea. People will die as a result of this experiment with nature and humans being the losers.
