Submission: Objection

Comments: This application raises its head once again in spite of being previously refused by this committee.

This site is rural, green belt land & development of it would infringe the rural nature & lead to increasing industrialisation of the countryside.

I do not live on top of this proposed development but I do live in Bagnall, where it will be clearly visible for miles around and, more importantly, ¿downwind¿ putting our village at risk of pollution should anything go wrong with these batteries. I understand that the revised plans do not address the access requirements required by the Fire Service? Also the surrounding areas are not conducive to tackling any major emergency due to the very narrow roads & rural nature.
