To whom it may concern

I write in reference to application No. SMD/2025/0266 2 Limewood Close Blythe Bridge.

Having looked at the plans online we feel that we have no aesthetic objection to the proposed extension but would like to put forward our concerns as to any possible additional increase in drainage water on to or under our property.

Our house at the rear of 2 Limewood Close is built on a level two to three feet lower so over the years we have worked with previous residents to contend with surface water drainage. If the proposed extension is to be built we would like to be assured that we will not experience an increase in drainage on to our property as a result, especially during adverse weather conditions.

We look to your expertise in this field to assess our concerns.

Yours faithfully

Gerald and Patricia Plant
