Email:

Submission: Objection

Comments: The proposed development is very close to a site of special interest, this will make the visual impact overly intrusive.

It will have a totally negative impact on local wildlife and will have a harmful effect on the visual amenities of the countryside.

The risk of fire and toxic gases is very concerning considering what other fires have happened at BESS sites across the country.

Greenbelt land is being lost at an alarming rate. Its there to be protected and not built upon for a quick money making scheme.

The proximity of the site is too close to local residents, access is limited.
