Email:

Submission: Objection

Comments: 1. Highways object to this plan and it is clear why. There is only one route in from the application which reduces the safety element of first responders to an emergency incident.

The application states there are no other viable sites, so why are we getting more applications in the vicinity?

There is a natural watercourse according to the information provided that runs through the site. Yet again, contamination risk is on the agenda of toxins from any thermal runaway.

The noise together with all of the other granted installations will be of an industrial nature, in a rural quiet area.
