Submission: Objection

Comments: The plans indicate that an EIA is essential. Green belt land and surrounds including residential areas will be affected negatively.

* The fields outlined in the plans have acted as a buffer for many years and as such have allowed nature and wildlife to flourish. Established wildlife would be at risk of being disturbed and displaced.

* This proposed development is inappropriate for the area and will cause increased noise affecting many residents on the outskirts of Shirleys Transport where the land is situated.

* There are already too many BESS sites in the locality being proposed and/or agreed which will cause industrialisation of the countryside.

* Due to the location of this land, the affect of these plans on the environment and its habitats cannot be minimised therefore an EIA is necessary.
