Submission: Objection

Comments: We both strongly object to this application on the grounds of highways, having seen their report dated 30.6.25.

How they can more or less say that Thorney Edge Road is ok to be used for 780 HCV movements over 12 months, it really does make us wonder!!! The only conditions are for a road sweeper to be used and conditions of the road surface!!!! which is an absolute joke. Highways don't even grit this lane in winter but it's ok for HCVs!!

Thorney Edge Road is 12 feet wide with no passing places. It is a single track road with a deep ditch running alongside. Resident's drives are used as passing places which will get completely destroyed if used by a HCV over and over again. This road has already collapsed at the bottom and is showing signs of collapsing again.

This lane is constantly used by walkers, runners, horse riders, farm vehicles as well as the usual daily traffic. There are no pavements for people to use as it is a country, single track lane.

It would be dangerous to have these large vehicles accessing the site via Thorney Edge Road.

You have only got to take a look yourselves to see what we mean.
