Submission: Objection

Comments: I whole heartedly object to this application due to a number of reasons.

A. Obviously the close proximity to the petrol station. There is a serious risk of fire and explosion which these sites are prone to.

2. Red kites, buzzards, owls, bats, deer and foxes all live in the vicinity and have been regularly seen. The batteries will have a negative effect on the local wildlife and detailed surveys and risk assessments must be taken into consideration.

Any water run off from this site when dealing with fires is likely to end up in the River Blythe causing environmental damage.

The site is close to a number of private dwellings and a high school. This is a potential high risk of fire site which can cause toxic vapour clouds.

Coupled with the sites at Rownall/bagnall the cumulative effect should be considered with a large increase in construction traffic causing a nuisance to all residents.
