Submission: Objection

Comments: I object to the proposal of the battery storage unit .

Firsty the address is incorrect & misleading the location is Cellarhead , not Werrington.

The safety aspect has not been seriously considered for the local residents within the area . The primary results such as thermal runaway, which can lead to fires and explosions with the releases into the atmosphere of toxic & flammable gases with potential of ground water contamination. The facilities poses realistic hazards to surrounding communities & the environment if they are not properly located designed & maintained. Any incidents involving fires are long drawn out incidents one taking 59 hours to extinguisher. The impact on the environment , nature / wildlife long standing trees would be catastrophic

Careful consideration of the site location has to be taken into consideration such a residents, schools and a petrol station . From what I can see these have not been considered or simply overlooked .
